

# AIREDALE TERRIER

BY STITCH PEOPLE

To achieve the curly-haired look of the Airedale Terrier, I recommend completing the entire dog pattern as “normal” using cross-stitches. Then, on top of the existing cross-stitching, create a series of French knots in the same floss color. This will create a curly-like texture.

I omitted the French knot circle symbol from the face area of the dog for clarity only. You may wish to continue these curly knots on the face as well. Use 1-2 threads of floss in a slightly darker color for definition of longer hairs around the eyes and mouth, should that be a feature on your terrier.
